

 What you need to create for the Hackathon:

Build a Business Project with Artificial Intelligence

Your Challenge

Imagine, design, and pitch a business project that leverages AI to solve a real-world problem.

Your mission is to create an innovative, scalable, and commercially viable startup that could be launched in today's market.

Your Project Should Answer These Questions

- What problem are you solving?
- Who are your target customers?
- How does AI create unique value?
- What is your business model?
- Why is your solution better than existing alternatives?

You Can Use

 **No-Code Platforms**
Use **Base44** strongly recommended

 **Large Language Models**
ChatGPT, Claude, Gemini

 **AI Agents**
Autonomous task execution

 **Image & Video Generation**
AI-powered visual content

 **Voice AI**
Speech recognition & synthesis

 **Automation**
n8n, Make, Zapier

 **AI APIs & Cloud Services**
Plug into powerful AI infrastructure
