

How to Build a Business with Artificial Intelligence

The Challenge

Imagine, design, and pitch a business that leverages AI to solve a real-world problem. Your mission is to create an innovative, scalable, and commercially viable startup that could be launched in today's market.

Your Project Should Answer These Questions

What problem are you solving?

Who are your target customers?

How does AI create unique value?

What is your business model?

Why is your solution better than existing alternatives?

You Can Use

No-Code Platforms

Base44 **strongly recommended**

Large Language Models

ChatGPT, Claude, Gemini

AI Agents

Autonomous task execution

Image & Video Generation

AI-powered visual content

Voice AI

Speech recognition & synthesis

Automation

n8n, Make, Zapier
